SUMMARY

Software Engineer with 2+ years of experience developing desktop and web applications in healthcare and medical imaging domains. Skilled in C++, C#, Python, React, TypeScript, WPF, and Django, with hands-on experience across both frontend and backend development. Experienced in MVVM architecture, Object-Oriented Programming (OOP), SQL, Git, Agile methodologies, and Multithreaded application development. Proven ability to quickly learn new technologies and adapt to project requirements while delivering scalable, maintainable, and high-performance software solutions.

EDUCATION

SH Thevara College

Bachelor of Computer Applications (BCA)

2023 – 2026

GPTC Cherthala

Diploma in Computer Engineering

2021 – 2024

EXPERIENCE

Software Engineer

June 2024 – Present

Trenser Technology Solutions

Trivandrum

- Develop and maintain healthcare and medical imaging applications using C#, WPF, Python, React, and TypeScript.
- Designed reusable WPF UserControls following MVVM architecture, reducing UI code duplication and improving maintainability.
- Collaborate with cross-functional teams to integrate imaging, processing, and visualization modules.
- Perform debugging, root-cause analysis, bug fixing, and feature enhancements across multiple applications.
- Contribute to software documentation including Software Requirement Specifications (SRS) and Software Design Specifications (SDS).
- Utilize Git and Azure DevOps within Agile development environments for collaborative software development.

PROJECTS

Neuro Surgery Assist Application | Technologies: C++, C#, Python, WPF

- Developed responsive WPF user interface components for a neurosurgical assistance platform.
- Ported Python-based detection algorithms to C++ for improved performance and seamless integration.
- Implemented feature enhancements and resolved software defects across multiple releases.
- Collaborated with cross-functional teams to integrate imaging and detection workflows.

Desktop DICOM Viewer | Technologies: C#, WPF, MVVM

- Developed application layout and secure authentication functionality using WPF and C#.
- Designed reusable UserControls following MVVM architecture to improve maintainability and UI consistency.
- Assisted in preparing Software Requirement Specifications (SRS) and Software Design Specifications (SDS).
- Enhanced user experience through responsive interface design and reusable component development.

Web-Based DICOM Viewer | Technologies: React.js, TypeScript, Python

- Maintained and enhanced a web-based DICOM Viewer application used for medical image visualization.
- Worked on DICOM image display functionalities including slice navigation and Multi-Planar Reconstruction (MPR).

- Contributed to image manipulation features such as Windowing, Zoom, Pan, and related viewing operations.
- Investigated and resolved production issues, improving application stability and user experience.
- Collaborated with frontend and backend teams to deliver enhancements with minimal disruption to existing workflows.

TECHNICAL SKILLS

Languages: C++, C#, Python, TypeScript, JavaScript, SQL, Java

Frontend: React.js, TypeScript, HTML, CSS, WPF, XAML

Backend: Python, Django, REST APIs

Frameworks & Technologies: .NET, WPF, MFC, OpenGL, MVVM

Tools: Visual Studio, VS Code, PyCharm, Git, GitHub, GitLab, Azure DevOps, Postman

Concepts: OOP, Multithreading, Design Patterns, SDLC, Agile Development, Software Documentation

Software Engineering

Desktop Application Development

Full-Stack Development

Medical Imaging Applications

Fast Learning & Adaptability

Problem Solving & Debugging

Cross-Functional Collaboration

Software Design & Architecture

Technical Documentation

Agile Team Collaboration

GITHUB & PERSONAL PROJECTS

GitHub: github.com/MUHAMMED-BILAL-KS - Developed personal projects involving Python, web development, desktop applications, and software engineering concepts. - Demonstrates continuous learning, problem-solving, and the ability to quickly adopt new technologies and frameworks. - Active exploration of frontend, backend, and full-stack development practices.
